Dinner, 5:30 p.m.

Film and Discussion, 6 -7:30 p.m.

- ★ Child care will be provided.
- ★ There is no charge for this event.
- ★ Space is limited. Registration is required.

Resilience: The Biology Of Stress & The Science of Hope chronicles the birth of a new movement among pediatricians, therapists, educators, and communities who are using cutting-edge brain science to disrupt cycles of violence, addiction, and disease.

The child may not remember, but the body remembers.

The original research was controversial, but the findings revealed the most important public health findings of a generation. *Resilience* is a one-hour documentary that delves into the science of Adverse Childhood Experiences (ACEs) and the birth of a new movement to treat and prevent Toxic Stress. Now understood to be one of the leading causes of everything from heart disease and cancer to substance abuse and depression, extremely stressful experiences in childhood can alter brain development and have lifelong effects on health and behavior. However, as experts and practitioners profiled in *Resilience* are proving, what's predictable is preventable. These physicians, educators, social workers, and communities are daring to talk about the effects of divorce, abuse, and neglect. And they're using cutting edge science to help the next generation break the cycles of adversity and disease.
